- Club CNPR
- Pom Fresh Juice

WORK EXPERIENCE

Keywords Studios - Japan - Tokyo (January 01, 2020 - Present)
APAC Systems engineer

As a lead of the APAC systems engineering team, one of the key aspects of my role was to unify IT processes within the region. I also served as the final escalation point for troubleshooting various technologies, including Office 365, AD, VMware, Veeam, and Linux OS.

Key Achievements and Responsibilities:

- Led the APAC systems engineering team and oversaw the deployment of ESXI infrastructures, including new servers and improvements to current configurations.
- Implemented a centralized WSUS infrastructure for the APAC region to ensure efficient and timely updates across all systems.
- Improved our software deployments strategy by utilizing tools such as PDQ and PowerShell, resulting in faster and more reliable software deployment and management.
- Implemented Jenkins to trigger PowerShell scripts, reducing the time required for user management and software deployment tasks.

By implementing Jenkins to automate PowerShell scripts, I significantly reduced the time required for user management and software deployment tasks. This helped to streamline our IT processes and allowed us to focus on more high-value tasks.

Keywords Studios - Japan - Tokyo (January 01, 2019 - December 31, 2019)
System and network administrator

I was responsible for network administration, including firewall (PaloAlto) and switches (Dell). I also leveraged my expertise in PowerShell to develop scripts that streamlined Windows Active Directory and Office 365 processes.

Key Achievements and Responsibilities:

- Provided expert-level technical assistance and acted as the main point of contact for production regarding new projects.
- Utilized a full spectrum of Windows technologies, including AD, DNS, DHCP, WSUS, and GPO, to optimize network efficiency and security.
- Automated administrative tasks using PowerShell, resulting in significant time savings and improved accuracy.
- Managed network/firewall administration (Dell and PaloAlto technology).
- Managed backup administration with Veeam.
- Successfully deployed a 2FA VPN solution leveraging PaloAlto GlobalProtect and LinOTP, which improved network security and performance. In 2020, led the deployment of this solution across APAC for OpenVPN and Apache2 authentication.

The French Tresuary - China - Beijing (October 01, 2016 - September 30, 2018)
System and network administrator

- Maintained, and managed a Windows domain-based infrastructure and network infrastructure.
- Onboarded and trained new employees on software usage and company procedures, enhancing team efficiency.
- Developed accessible online documentation to help employees resolve day-to-day IT issues independently.

Achievement:
Successfully implemented an MPLS network in collaboration with Business France, significantly improving the stability of China office connections with an European data center.
